

## BEING INSPIRED BY PHARMACY MODERNIZATION

Tecnilab is one of the leading manufacturer of automated storage and dispensary solutions for boxed medicines and of pharmaceutical equipments like weight scales and blood pressure measurement devices since 1970. We provide a new vision of workflow in the healthcare field thanks to a complete range of products and first class solutions.

Would you like to be 100% functional even in the busiest moments? We promise, 360 degrees efficiency and a smooth workflow .

### THE MEANING OF "AUTOMATION"

When we say Automation, what do we mean precisely?

Well, Tecnilab automation systems are destined to hospitals and pharmacies and they are created to handle the stock of medicines of these hospitals and pharmacies. Until now, medicines were stored in the pharmacy in a chaotic manner, but with our automation system they can be sorted, identified and stored. Every counter in the pharmacy is connected to a robot-operated dispensary, in which a robot selects the desired remedy from the shelves. This allows to order the drug directly from the counter and receive it rapidly. From the supplier to the final customer.

Some of the key advantages that derive from this solution:

1. **First:** the professional figure of the pharmacist acquires more value, since he has more time to spend with the customer instead of wasting time in looking for the drugs;
2. **Second:** the automation is a system of new generation and of course it gives a new image of style to the pharmacy. In fact our systems are projected by notorious architects and in our job we do not renounce to the well known Italian sense of aesthetics;
3. **Third:** this allows to free space for the retail and exposition as well;
4. **Last but not the least:** In an medium size pharmacy with 212 customers per day it allows to save 11 working hours each day. It means a strong saving of time and energy, besides an increase of productivity.

Well, this specific kind of automation systems has become a real intelligent assistant for the pharmacist in recent years and this is witnessed by the big success it got all around the world.
